Oral (Enteral) Sedation Courses
Introduction & Review Course
Course Faculty: Benjamin R. Record, DDS, Michael D. Webb, DDS, MEd, and Alfredo Arribas, DDS, MS
Friday - Saturday
June 19 - 20, 2015
Course Location
LSU School of Dentistry
1100 Florida Avenue
New Orleans, LA 70119
Phone (504) 941-8193
20 hours clinical CDE credit
(4 hours self-instructed study/14 hours live lecture/2 hours participation)
AGD #343 (Oral Sedation) or AGD #164 (Oral Sedation-Elective)

Introduction Course

Course #31-15
Registration Fees
$1725 (Dentist)
$295 (Team Member: Hygienist, Dental Assistant)
Objective
This course is designed as a competency course for dentists who must meet the Louisiana State Board of Dentistry educational requirement to obtain an unrestricted (adults & children under 13) or restricted (adults only) permit to administer moderate sedation with enteral (oral) drugs to patients. Adults, teens, children, and special needs patients are covered in this course.
Overview
This introduction course is an integrated course that covers not only children and adults but also teens and special needs patients. In designing this course, the course director recognizes that not every dentist sedates both children and adults; however, he cannot offer you the quality sedation education you deserve without a proper flow of material that builds one step upon another and deals with different types of patients (some of which you may not treat).

The last session of this course focuses on you the practitioner. You will participate in a review of case presentations taken from the practices of the course faculty. This will enable you to apply your newly acquired sedation knowledge in a simulation environment working with highly trained and experienced practitioners of sedation dentistry.

These case presentations will be interactive, with the floor open to questions and feedback for those who are experienced and for those who are beginners in the art of sedation dentistry. By Monday morning, you should be able to use some of the recommended recipes for predictable results; and, you should know where the limits are to avoid complications.

Review Course

Course #31-15-1
Registration Fees
$1295 (Dentist)
$295 (Team Member: Hygienist, Dental Assistant)
Objective
This course is designed as a review course for dentists who must meet the Louisiana State Board of Dentistry educational requirement to obtain an unrestricted or restricted renewal permit to administer moderate sedation with enteral (oral) drugs to either adults and children or to adults only. (LSBD Professional & Occupational Standard 1509). In summary, as long as you continue to sedate patients (i.e., adults and/or children) in your office, you are required to “...complete a board approved course pertinent to your level of permit no less than once every six years.” LSBD POS 1611
Overview
Because the course director knows not every dentist treats adults and children (anyone under the age of 13) and he recognizes you will treat other types of patients, this review course was designed as an integrated course that covers not only children and adults but also teens and special needs patients.

This review course is priced considerably lower than the introduction course, but it has the same number of credit hours. The same 20 credit hours are required for both courses, because our course faculty cannot economically design a shorter review course that maintains the same quality sedation education contained in the introduction course. The reason for this is that quality sedation education requires a minimum number of hours to present a proper flow of material that builds one step upon another and deals with different types of patients (some of which you may not treat).

The last session of this review course focuses on you the practitioner. You will participate in a review of case presentations taken from the practices of the course faculty. This will enable you to apply your increased sedation knowledge and experience in a simulation environment working with highly trained and experienced practitioners of sedation dentistry.

These case presentations will be interactive, with the floor open to questions and feedback for those who are experienced and for those who are relatively inexperienced in the art of sedation dentistry. If you limit your practice to pediatric patients only, focus your attention on the pediatric faculty member and his case presentations. Ask the pediatric faculty member questions about his cases and ask his advice about the pediatric cases that have challenged you.

By Monday morning, you should be better prepared to use some of the recommended recipes for predictable results with adults and/or children; and, you should know where the limits are with each type of patient in order to avoid complications.
In addition to placing a priority on learning the nuts and bolts of sedation dentistry and how sedating children is different from sedating adults, the introduction and review course also place a priority on two other areas: **adverse events related sedation dentistry and how these can be prevented and managed**, and **preparing and training your auxiliary staff for sedation dentistry**.

For a nominal fee of $295, a member of your dental team can train with you, be exposed to the same lecture material, and learn by asking questions and receiving feedback during the real-life case presentations at the end of the course.

### Topics Covered in the Introduction & Review Course

**Understanding the Nuts & Bolts of Sedation Dentistry**
- How to assess patients’ mental and physical status prior to sedation
- The mandated and recommended armamentarium
- “Recipes” for sedation dentistry for minimal to moderate sedation

**Adverse Events Related to Sedation Dentistry: Prevention & Management**
- Guidelines that will help you prevent emergencies
- How to prepare your office staff for emergencies directly or indirectly related to sedations

**A Review of the Differences between Sedating Children and Sedating Adults**
- Children are not tiny adults: learn the difference
- Learn what works on children, teens and special needs adults from faculty that treat all three

**Preparing & Training Your Auxiliary Staff for Sedation Dentistry**
- Proven protocols for repeatable, safe outcomes
- How to train staff to read patients and identify potential candidates when they walk in
- Proper language to avoid problems and lead patients to comfort zones for better results

**Case Presentations from the Practices of the Course Faculty**
- Faculty members present their personal “recipes” from their practices
- Cases where sedation worked and where it didn’t (and how they fixed it)

### Course Faculty

**Benjamin R. Record, DDS**
A general dentist in private practice in the Baton Rouge area, Dr. Record received his DDS from LSU School of Dentistry. Prior to entering private practice, he served as director of a dental clinic in Pineville, Louisiana and also served LSU School of Dentistry as Director of the General Practice Residency Program and Assistant Professor in the Department of Comprehensive Dentistry and Biomaterials. Dr. Record is a very active faculty member for LSU Health Continuing Dental Education in the overall area of sedation dentistry. In addition to being the Course Director of the Oral (Enteral) Sedation Introduction Course, the Oral (Enteral) Sedation Review Course, he is working on the development of a new Local Anesthesia Training Course for Hygienists.

**Michael D. Webb, DDS, MEd**
Before accepting his current position as director of the Pediatric Residency Program at East Carolina University School of Dental Medicine, Dr. Webb was in private pediatric dental practice in the Richmond, Virginia area. A board-certified pediatric dentist, Dr. Webb is a graduate of Northwestern University Dental School. He completed a certificate in pediatric dentistry from Children’s Hospital in Pittsburg and then completed a residency in dental anesthesia from the University of Pittsburg School of Dental Medicine. He is a fellow in Anesthesiology of the American Dental Society of Anesthesiology and a diplomate of both the American Board of Dental Anesthesiology and the National Dental Board of Anesthesiology. In addition to his many other talents, Dr. Webb has served as a Virginia emergency medical technician (EMT) since 2005 and as a basic cardiac life support instructor since 2006.

**Alfredo R. Arribas, DDS, MS**
Prior to accepting his current position as Associate Professor in the Department of Oral & Maxillofacial Surgery at The University of Texas Health Science Center, School of Dentistry in San Antonio, Texas, he was an oral surgeon in private practice in El Paso, Texas. Dr. Arribas received his DDS from the Universidad Peruana Cayetano Heredia in Lima, Peru. His post-doctoral training includes: certificates in Advanced Education in General Dentistry (AEGD) at the University of Maryland School of Dentistry, a two-year General Practice Residency (GPR) Program at LSU School of Dentistry, an MS degree in Health Care Management from the University of New Orleans, and completion of a four year residency in Oral & Maxillofacial Surgery at LSU in New Orleans. His academic career includes serving as Program Director of the GPR program at LSU School of Dentistry and Associate Program Director of the AEGD Program at the University of Maryland.

LSU Health Continuing Dental Education is an ADA CERP Recognized Provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP neither approves nor endorses individual courses or instructors nor does it imply acceptance of credit hours by boards of dentistry. Concerns or complaints about a CE provider may be directed to the provider or to or to the Commission for Continuing Education Provider Recognition at www.ada.org/CE.

**CANCELLATION & REFUND POLICY:** The Louisiana Academy of Continuing Dental Education, Inc. (d/b/a: LSU Health Continuing Dental Education) reserves the right to cancel any course should circumstances warrant such action. In the event a course is cancelled, the Academy will refund the full tuition. If you cancel your registration for this course, the Academy will refund you tuition (minus an administrative cancellation fee of 10% the tuition you paid). We must receive your written cancellation request no later than June 5, 2015 by mail, fax at (504) 941-8403, or email at info@lsucde.org. If LSU Health CDE receives notification of your cancellation after the cancellation deadline or after the course begins, this will result in forfeiture of the entire tuition.
